Women, Wildness, and Gardens: Jane Austen's Picturesque

Guest Speaker: Dr. Inger S. B. Brodey North Carolina History Center, Cullman Performance Hall

\$6 per adult, \$3 per child or included with regular admission

Join Tryon Palace and the Jane Austen Society of North America's North Carolina regional group as they present a special lecture by guest speaker Dr. Inger S. B. Brodey in celebration of the 200th anniversary of Jane Austen's beloved novel, *Pride and Prejudice*. Jane Austen's brother wrote following her death "She was a warm and judicious admirer of landscape, both in

nature and on canvass. At a very early age she was enamoured of Gilpin on the Picturesque; and she seldom changed her opinions either on books or men." Jane Austen not only loved to read William Gilpin, but was also engaged in the landscape issues of her time, particularly the movement away from the baroque, French style of landscape gardening towards the "English" naturalistic garden. In her novels, she presents her fascination with the picturesque aesthetic in landscape, as well as a "human" picturesque. Elizabeth Bennet of *Pride and Prejudice* shows similar knowledge of the picturesque and uses it to her own advantage. This discourse on the picturesque and references to wildness in the novel help us to understand not only Austen's own visual aesthetic, but also important moral and political content of her most beloved novel. Dr. Inger S.B. Brodev is the Bank of America Distinguished Term Professor in Honors, an Associate Professor of English and Comparative Literature, an Affiliate faculty in the Department of Asian Studies, an Affiliate faculty in Global Studies, and the Director of the Comparative Literature Program at UNC-CH. She is also the author of Ruined by Design: Shaping Novels and Gardens in the Culture of Sensibility.

"War of 1812: A Nation Forged By War"

Mattocks Hall, North Carolina History Center. Free

In conjunction with "Jane Austen in June," Tryon Palace is hosting the traveling panel exhibit, "War of 1812: A Nation Forged by War," which was created to commemorate the 200th anniversary of the war. Fought between the United States and Great Britain between June 1812 and February 1815, the War of 1812 was sparked by conflicting maritime policies and competing western expansion along the United States-Canadian frontier. "War of 1812: A Nation Forged by War," as a small and highly informative traveling exhibit, highlights the prominent role of the U.S. Navy, U.S. Marine Corps, and the U.S. Revenue Cutter Service in bringing Great Britain to the negotiating table and forcing European recognition of a truly independent United States. The favorable outcome greatly elevated the international standing of the United States and boosted the self confidence of the American people at a critical time in their history.
